

Project Title

Car Sales Dashboard

Objective

The objective of this project was to create a data visualization that conveys a compelling story using sales data. The goal was to master the art of visual storytelling with charts and graphs, focusing on business insights.

Task

This dashboard was created as part of the Elevate Labs Data Analyst Internship Task 2: Data Visualization and Storytelling.

Tools Used

- Power BI
- Car Sales Dataset (or other sales data of choice)

Visualizations & Key Insights

The dashboard provides a visual overview of car sales performance, highlighting key metrics and trends:

- **Total Sales and Average Price:** Displays the overall sales value and the average price of cars sold.
- **Sales Trend by Year:** A line chart shows the yearly trend in car sales, allowing for an analysis of sales growth over time.
- **Sales by Price and Fuel Type:** A bar chart and a donut chart visualize the distribution of sales across different price points and fuel types.
- **Sales by Manufacturer:** A pie chart provides a breakdown of car models by manufacturer, showing which manufacturers have the most models represented in the data.

Submission

The final deliverable for this task was a visual report, submitted in the form of a dashboard pdf and Power BI.
